EXPERIMENT – 09

ROLL NO : 240701801 NAME: Dharshan D

USER INTERFACE AND DESIGN

To design input forms that validate user data such as email and phone number, and display appropriate error messages using HTML, CSS, JavaScript, and Validator.js.

Step 1: Setting Up the HTML Form

Code (HTML):

```
<!DOCTYPE html>
<html>
<head>
   <title>Form Validation</title>
</head>
<body>

<h2>User Form</h2>

<form id="myForm">
   <label>Email:</label><br>
   <input type="text" id="email"><br>
   <span id="emailError" style="color:red;"></span><br><br>

   <label>Phone Number:</label><br>
   <input type="text" id="phone"><br>
   <span id="phoneError" style="color:red;"></span><br><br>

   <button type="submit">Submit</button>
</form>

</body>
</html>
```

Output Screen (Step 1)

Step 2: Styling the Form with CSS

Code

```
<style>
body {
   font-family: Arial;
   background-color: #f4f4f4;
}

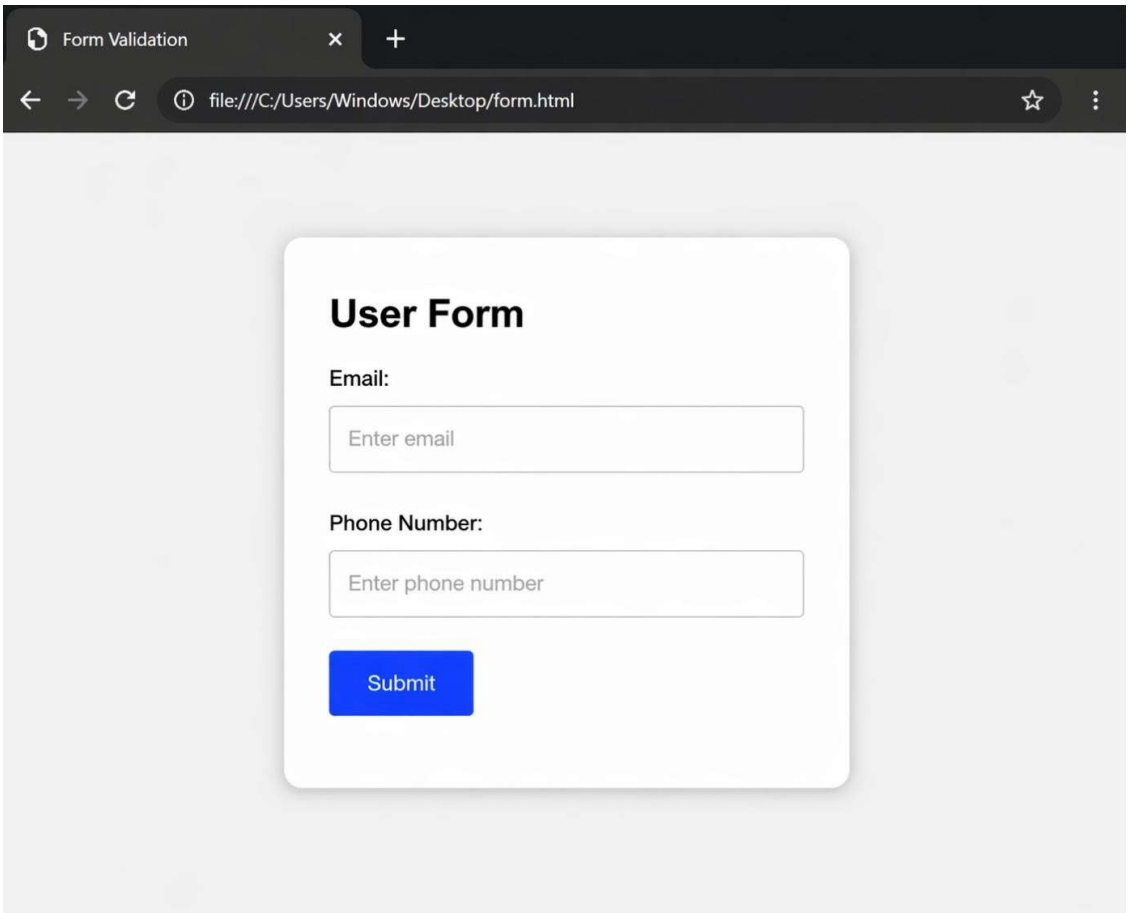
form {
   width: 300px;
   margin: 50px auto;
   padding: 20px;
   background: white;
   border-radius: 10px;
   box-shadow: 0px 0px 10px gray;
}

input {
   width: 100%;
   padding: 8px;
   margin-top: 5px;
}

button {
   padding: 10px;
   background-color: blue;
   color: white;
   border: none;
   cursor: pointer;
}
</style>
```

Output Screen (Step 2)

-



Step 3: JavaScript Validation using Validator.js

JavaScript Code

```
<script>
document.getElementById("myForm").addEventListener("submit", function(event) {
   event.preventDefault();

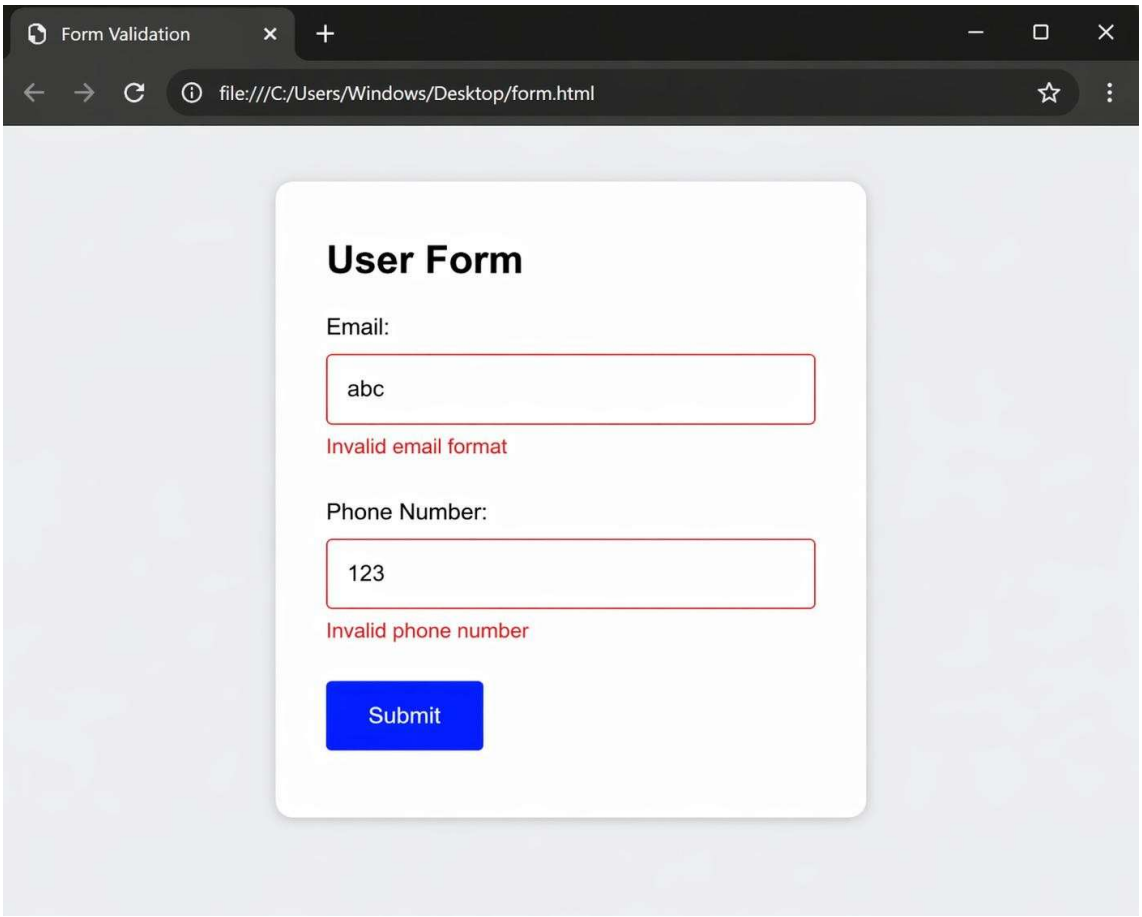
   let email = document.getElementById("email").value;
   let phone = document.getElementById("phone").value;

   let emailError = document.getElementById("emailError");
   let phoneError = document.getElementById("phoneError");

   emailError.textContent = "";
   phoneError.textContent = "";

   let valid = true;

   // Email validation
   if (!validator.isEmail(email)) {
      emailError.textContent = "Invalid email format";
      valid = false;
   }

   // Phone validation (10 digits)
```


```
    if (!validator.isMobilePhone(phone, 'any')) {
        phoneError.textContent = "Invalid phone number";
        valid = false;
    }

    if (valid) {
        alert("Form submitted successfully!");
    }
});
</script>
```
