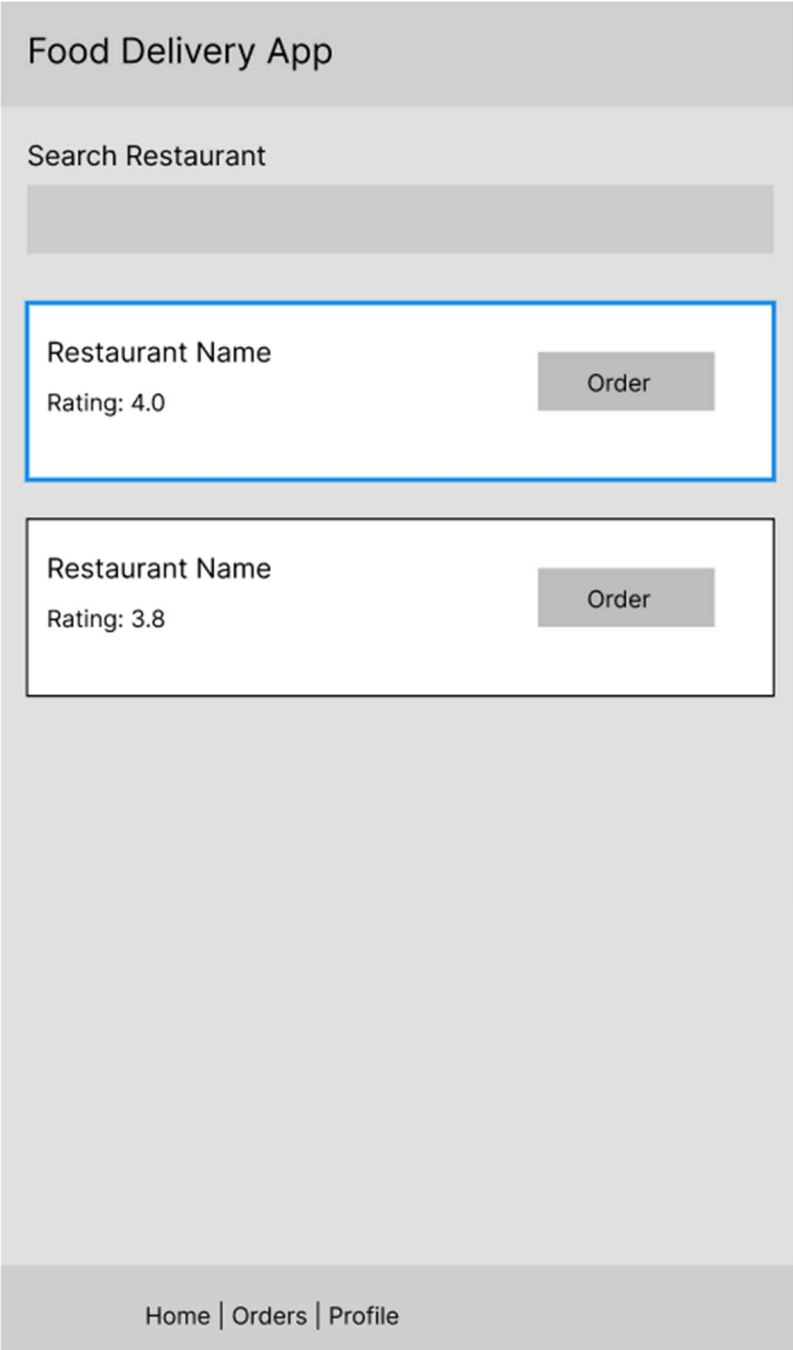
EXPERIMENT 1

ROLL NO: 240701801 NAME: Dharshan D

Old UI Design



Features & Drawbacks Identified:

• Plain & Outdated UI:

- The interface was very simple and text-heavy.
- No images of food or restaurants were used.
- The overall design looked dull and unattractive to users.

• Poor Visual Appeal:

- Restaurants were displayed only as text lists.
- No use of icons, cards, or images to attract users.
- The UI failed to create interest or excitement in ordering food.

• Low Readability & Spacing Issues:

- Font size was small and inconsistent.
- Proper spacing between elements was missing.
- Information looked crowded on the screen.

• Weak Visual Hierarchy:

- Important details like restaurant name, rating, and order button were not highlighted.
- All elements looked similar, making it hard to focus on key actions.

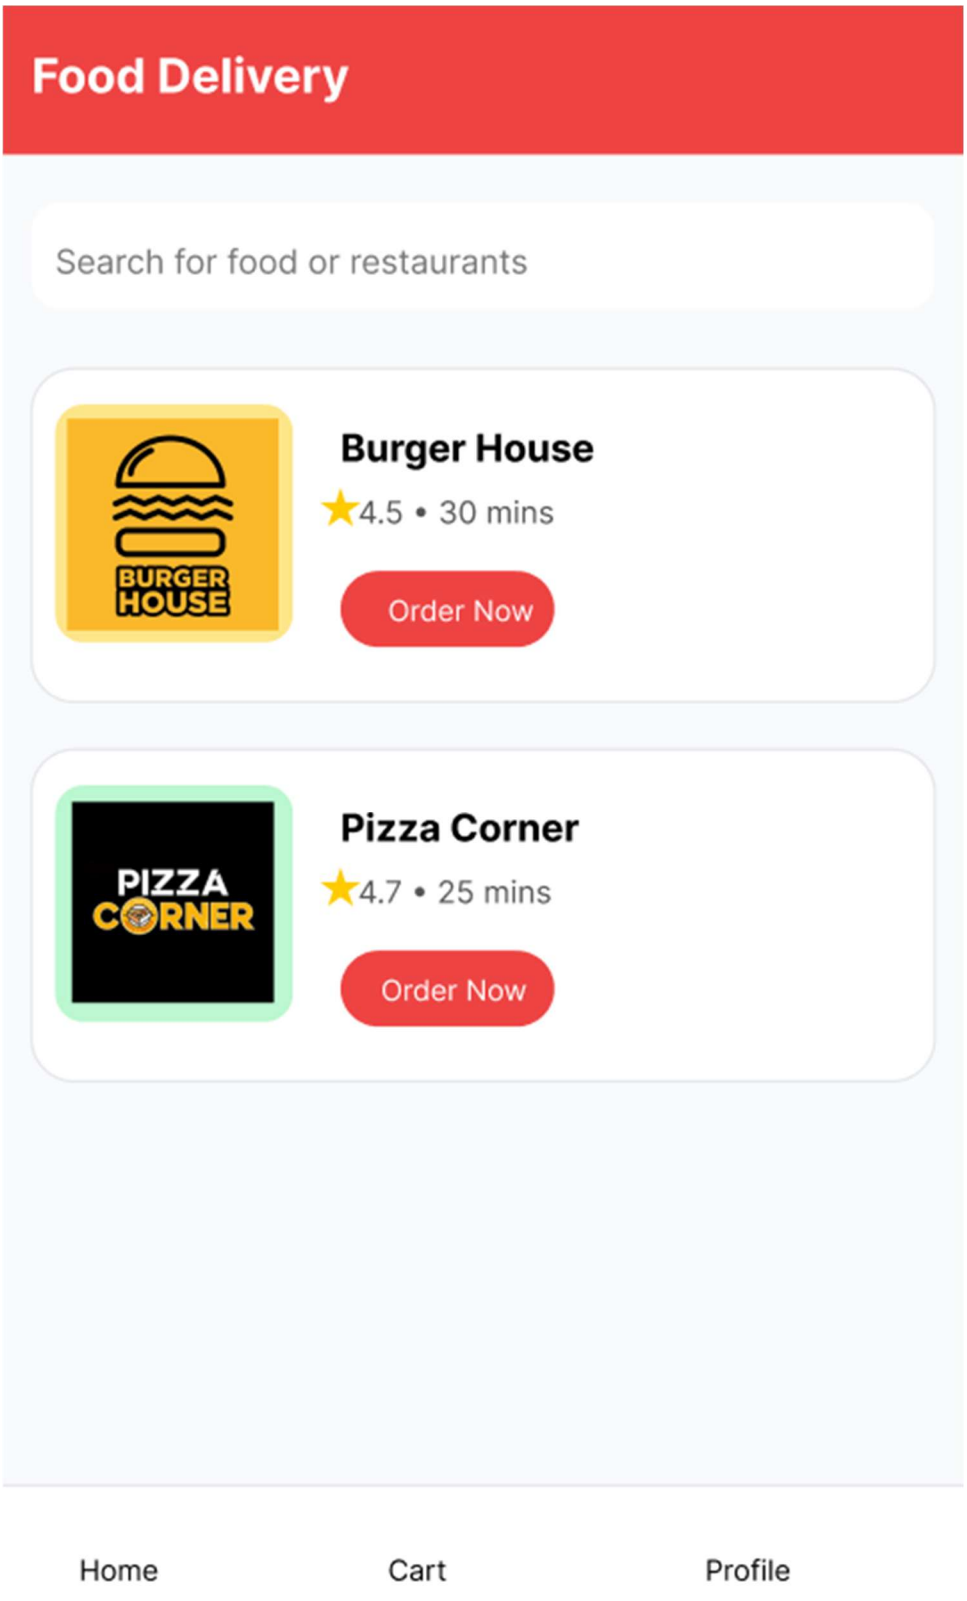
• Inefficient Navigation:

- The bottom navigation bar was basic and unclear.
- Users found it difficult to quickly access cart or profile options.

• Poor User Engagement:

- The “Order” button looked inactive and unattractive.
- The UI did not encourage users to explore more restaurants.

Modified UI Design



Features & Enhancements:

• Modern & Attractive UI:

- A clean and colorful design is used.
- Food-related visuals and icons improve user engagement.
- The interface feels fresh and updated.

• Visual Restaurant Cards:

- Restaurants are displayed in card format.
- Each card includes food image, restaurant name, rating, and delivery time.
- This makes selection easier and more appealing.

• Improved Typography & Spacing:

- Larger and clearer fonts are used for better readability.
- Proper spacing improves clarity and comfort while browsing.

• Strong Visual Hierarchy:

- Important information like restaurant name and rating is highlighted.
- “Order Now” button stands out clearly.

• Enhanced Navigation:

- Bottom navigation uses icons for Home, Cart, and Profile.
- Users can navigate faster with fewer steps.

• Better User Interaction:

- Bright call-to-action buttons encourage ordering.
- The UI creates a smooth and enjoyable food ordering experience.
